

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) An aerosol device comprising:

(A) a cosmetic composition comprising, in a cosmetically acceptable medium comprising water and at least one organic solvent, at least one polyurethane of dimethylolpropionic acid/isophorone diisocyanate/neopentyl glycol/polyesterdiols/silicone diamine copolymer, and, at least one polyurethane comprising at least one base repeating unit corresponding to the general formula (II):

~~wherein:~~

~~P is a polysiloxane segment;~~

~~X', which may be identical or different, is chosen from O and NH; and~~

~~R is a divalent radical chosen from branched and unbranched alkylene radicals chosen from C<sub>6</sub>-C<sub>20</sub>-aromatic, C<sub>4</sub>-C<sub>20</sub>-aliphatic, and C<sub>4</sub>-C<sub>20</sub>-cycloaliphatic, alkylene radicals, wherein the alkylene radicals are optionally substituted with at least one group chosen from halogen, C<sub>4</sub>-C<sub>4</sub>-alkoxy, and C<sub>6</sub>-C<sub>30</sub>-aryl groups;~~

and

(B) at least one propellant comprising dimethyl ether and n-butane.

Claims 2-3. (Cancelled).

4. (Previously Presented) An aerosol device according to claim 1, further comprising

at least one polyurethane comprising at least one base repeating unit  
corresponding to the formula (I) below:

wherein:

- X', which may be identical or different, is chosen from O and NH;
- B is chosen from divalent, substituted and unsubstituted, hydrocarbon-based radicals; and
- R is a divalent radical chosen from branched and unbranched alkylene radicals chosen from C<sub>6</sub>-C<sub>20</sub> aromatic, C<sub>1</sub>-C<sub>20</sub> aliphatic, and C<sub>1</sub>-C<sub>20</sub> cycloaliphatic, alkylene radicals, wherein the alkylene radicals may be optionally substituted with at least one group chosen from halogen, C<sub>1</sub>-C<sub>4</sub> alkoxy and C<sub>6</sub>-C<sub>30</sub> aryl groups, and

(B) at least one propellant comprising dimethyl ether and n-butane.

5. (Original) The aerosol device according to Claim 4, wherein the C<sub>1</sub>-C<sub>20</sub> aliphatic alkylene radicals are chosen from C<sub>1</sub>-C<sub>6</sub> aliphatic alkylene radicals.

6. (Original) The aerosol device according to Claim 4, wherein the C<sub>1</sub>-C<sub>20</sub> cycloaliphatic alkylene radicals are chosen from C<sub>1</sub>-C<sub>6</sub> cycloaliphatic alkylene radicals.

7. (Original) The aerosol device according to Claim 4, wherein, in defining R, the at least one group is a phenyl group.

8. (Original) The aerosol device according to Claim 4, wherein the radical B is chosen from divalent C<sub>1</sub>-C<sub>30</sub> hydrocarbon-based radicals.

9. (Original) The aerosol device according to Claim 4, wherein R is chosen from hexamethylene, 4,4'-biphenylenemethane, 2,4-tolylene, 2,6-tolylene,

1,5-naphthylene, p-phenylene, methylene-4,4-bis-cyclohexyl, and a divalent radical derived from isophorone.

Claims 10-13. (Cancelled).

14. (Original) The aerosol device according to Claim 1, wherein the at least one polyurethane is present in the cosmetic composition in an amount ranging from 0.5% to 20% by weight, relative to the total weight of all the compositions comprised in the aerosol device.

15. (Original) The aerosol device according to Claim 14, wherein the at least one polyurethane is present in the cosmetic composition in an amount ranging from 2% to 12% by weight, relative to the total weight of all of the compositions comprised in the aerosol device.

16. (Original) The aerosol device according to Claim 1, wherein the at least one propellant is present in the cosmetic composition in an amount ranging from 20% to 70% by weight, relative to the total weight of all of the compositions comprised in the aerosol device.

17. (Previously Presented) The aerosol device according to Claim 1, wherein n-butane is present in the at least one propellant in an amount ranging from 1% to 30% by weight, relative to the total weight of all the compositions comprised in the aerosol device.

18. (Previously Presented) The aerosol device according to Claim 17, wherein n-butane is present in the at least one propellant in an amount ranging from 5% to 20% by weight, relative to the total weight of all of the compositions comprised in the aerosol device.

19. (Original) The aerosol device according to Claim 1, wherein the dimethyl ether is present in the at least one propellant in an amount ranging from 5% to 70% by weight, relative to the total weight of all the compositions comprised in the aerosol device.

20. (Original) The aerosol device according to Claim 19, wherein the dimethyl ether is present in the at least one propellant in an amount ranging from 10% to 50% by weight, relative to the total weight of all of the compositions contained in the aerosol device.

21. (Original) The aerosol device according to Claim 1, wherein the at least one organic solvent is chosen from alcohols.

22. (Original) The aerosol device according to Claim 21, wherein the alcohols are chosen from at least one of lower C<sub>1</sub>-C<sub>4</sub> alcohols, polyols and polyol ethers.

23. (Original) The aerosol device according to Claim 22, wherein the C<sub>1</sub>-C<sub>4</sub> alcohol is ethanol.

Claims 24-27. (Cancelled)

28. (Original) The aerosol device according to Claim 1, wherein the cosmetic composition comprises at least one adjuvant chosen from non-polyurethane fixing polymers; silicones in soluble, dispersed and microdispersed form; nonionic, anionic, cationic and amphoteric surfactants; ceramides and pseudoceramides; vitamins and provitamins; plant, animal, mineral and synthetic oils; waxes other than ceramides and pseudoceramides; water-soluble and liposoluble, silicone and non-silicone sunscreens; glycerol; mineral and organic, colored and uncolored pigments; permanent and temporary dyes; nacreous agents and opacifiers; sequestering agents; plasticizers;

solubilizing agents; acidifying agents; basifying agents; mineral and organic thickeners; antioxidants; hydroxy acids; penetration agents; fragrances; fragrance solubilizers; preserving agents; anticorrosion agents; and treatment agents.

29. (Original) The aerosol device according to Claim 28, wherein the vitamins and pro-vitamins are chosen from panthenol.

30. (Currently Amended) A method for shaping and/or holding a hairstyle, comprising:

providing an aerosol device comprising,

(A) a cosmetic composition comprising, in a cosmetically acceptable medium comprising water and at least one organic solvent, at least one polyurethane of dimethylolpropionic acid/isophorone diisocyanate/neopentyl glycol/polyesterdiols/silicone diamine copolymer, and at least one polyurethane comprising at least one base repeating unit corresponding to the general formula (II):

—wherein:

—P is a polysiloxane segment;

—X', which may be identical or different, is chosen from O and NH; and

—R is a divalent radical chosen from branched and unbranched alkylene radicals chosen from C<sub>6</sub>-C<sub>20</sub> aromatic, C<sub>4</sub>-C<sub>20</sub> aliphatic, and C<sub>4</sub>-C<sub>20</sub> cycloaliphatic, alkylene radicals, wherein the alkylene radicals are optionally substituted with at least one group chosen from halogen, C<sub>1</sub>-C<sub>4</sub> alkoxy, and C<sub>6</sub>-C<sub>30</sub> aryl groups;

and

(B) at least one propellant comprising dimethyl ether and n-butane,

applying the contents of the aerosol device onto the hair by vaporizing the contents of the aerosol device onto the hair, in an amount sufficient to hold or shape a desired hairstyle.

31. (Currently Amended) A hair lacquer, wherein the hair lacquer is obtained by vaporizing the contents of an aerosol device comprising,

(A) a cosmetic composition comprising, in a cosmetically acceptable medium water and at least one organic solvent, at least one polyurethane of dimethylolpropionic acid/isophorone diisocyanate/neopentyl glycol/polyesterdiols/silicone diamine copolymer, and at least one polyurethane comprising at least one base repeating unit corresponding to the general formula (II);

~~wherein;~~

~~P is a polysiloxane segment;~~

~~X', which may be identical or different, is chosen from O and NH; and~~

~~R is a divalent radical chosen from branched and unbranched alkylene radicals chosen from C<sub>6</sub>-C<sub>20</sub>-aromatic, C<sub>4</sub>-C<sub>20</sub>-aliphatic, and C<sub>4</sub>-C<sub>20</sub>-cycloaliphatic, alkylene radicals, wherein the alkylene radicals are optionally substituted with at least one group chosen from halogen, C<sub>4</sub>-C<sub>4</sub>-alkoxy, and C<sub>6</sub>-C<sub>30</sub>-aryl groups, and~~

(B) at least one propellant comprising dimethyl ether and n-butane.

32. (Currently Amended) A method for applying a lacquer to the hair comprising,

-providing an aerosol device comprising,

(A) a cosmetic composition comprising, in a cosmetically acceptable medium comprising water and at least one organic solvent, at least one polyurethane of dimethylolpropionic acid/isophorone diisocyanate/neopentyl glycol/polyesterdiols/silicone diamine copolymer, and at least one polyurethane comprising at least one base repeating unit corresponding to the general formula (II):

—wherein:

—P is a polysiloxane segment;

—X', which may be identical or different, is chosen from O and NH; and

—R is a divalent radical chosen from branched and unbranched alkylene radicals chosen from C<sub>6</sub>-C<sub>20</sub>-aromatic, C<sub>4</sub>-C<sub>20</sub>-aliphatic, and C<sub>4</sub>-C<sub>20</sub>-cycloaliphatic, alkylene radicals, wherein the alkylene radicals are optionally substituted with at least one group chosen from halogen, C<sub>1</sub>-C<sub>4</sub>-alkoxy, and C<sub>6</sub>-C<sub>30</sub>-aryl groups;

and

(B) at least one propellant comprising dimethyl ether and n-butane, vaporizing the contents of the aerosol device onto the hair, whereby a lacquer is formed on the hair.
